SUMMARY

Computer Science graduate with hands-on experience in full-stack web development, machine learning, and AI-powered application development. Proficient in Python, JavaScript, SQL, React, Node.js, Express.js, and Django, with practical experience building scalable web applications, RESTful APIs, and cryptocurrency forecasting systems using machine learning and deep learning techniques. Experienced in data preprocessing, sentiment analysis, database management, and backend development. Passionate about developing innovative software solutions, continuously learning new technologies, and applying analytical and problem-solving skills to solve real-world challenges.

EDUCATION

Government College Of Engineering Kannur Bachelor of Technology(B.Tech), Computer Science	2023-2026
AKNM Govt Poly Technic College Thirurangadi Diploma, Computer Science	2021-2023
PKMM Higher Secondary School Edarikode Higher Secondary Certificate	2017-2019
PKMM Higher Secondary School Edarikode High School	2016-2017

RELEVANT COURSEWORK

- Data Structures and Algorithms
- Database Management Systems
- Operating Systems
- Computer Networks
- Machine Learning Fundamentals
- Deep Learning

SKILLS

- **Languages:** Python, SQL, JavaScript, C, C++
- **Frameworks:** Django, React, Node.js, Express.js
- **Databases:** MySQL, MongoDB
- **Libraries:** Scikit-learn
- **Tools:** Git, GitHub
- **Soft Skills:** Communication, Presentation, Team Collaboration

PROJECTS

Crypto Market Trend Prediction Model (Final Year Project) | Python, Django, PyTorch, TFT, Pandas, NumPy, Scikit-learn, VADER, RoBERTa

- Used **Pandas** and **NumPy** to collect, clean, preprocess, and transform historical cryptocurrency market data.
- Performed sentiment analysis on market-related text data using **VADER** and **RoBERTa** to extract sentiment features.
- Implemented forecasting and prediction models using **Scikit-learn**, **PyTorch**, and **Temporal Fusion Transformer (TFT)** for cryptocurrency trend prediction.
- Developed and integrated the prediction dashboard using **Django** to visualize forecasting and sentiment analysis results.

College Canteen Food Ordering System (Mini Project) | React, Node.js, Express.js, MongoDB, Mongoose, JWT, Axios

- Developed responsive user interfaces and page navigation using **React** and **React Router**.
- Built backend APIs and application logic using **Node.js** and **Express.js** for order processing and management.
- Integrated **MongoDB** and **Mongoose** to manage users, menu items, carts, and order data.
- Implemented secure authentication using **JWT** and **bcrypt**, and connected frontend and backend using **Axios**.
- Added notification functionality using **Nodemailer** to improve user communication.

Senior Friendly Social Media Platform (Diploma Final Project) | Python, Django, HTML, CSS, JavaScript, SQLite, Django-allauth, Pillow, PyJWT

- Developed a social media platform for senior citizens using **Django**, with a focus on accessibility and simple navigation.
- Implemented user authentication, profile management, and social interaction features using **Django-allauth** and **PyJWT**.
- Built responsive user interfaces using **HTML**, **CSS**, and **JavaScript** for improved user experience.
- Managed application data using **SQLite** and integrated **Pillow** for handling profile and post images.

Training & Industrial Exposure

Python Programming Training | MAXLORE INNOVATIONS LLP, UL CYBER PARK (29/08/22 - 11/09/22)

Completed an industrial visit at Maxlore Innovation LLP for 14 days, undertaking Python programming certification included the fundamentals of python, writing and debugging code. The visit provided insights into real-world software development practices, coding standards, and project workflows in an IT environment.

CERTIFICATIONS

- Python Foundation Certification, Infosys Spring Board
- Python Internship Certification, Navodita Infotech
